Amazingly realistic terrain mats!

We are very proud to present to you our superb range of flexible textured mats, gorgeously hand painted to give you a superior quality backdrop for your battles that can be safely rolled up for easy transport!

Please do not ask for discounts, high quality products are expensive. We believe these are the best terrain backdrops available on the market; every mat is painstakingly hand made and hand painted (incidentally, that means no two mats can ever be identical!). These are not mass produced industrial products, they are the work of very skilled artists and are necessarily priced accordingly. Don't get this the wrong way, but if price is your main concern there are plenty cheaper alternatives elsewhere...

These mats are not printed fabrics but are made up of a number of layers built on a strong heavy synthetic non-woven fabric, colored and flocked as appropriate to give an even more realistic effect. The ground scatter, grass and flocks are sealed and embedded right into the material itself and are guaranteed to withstand the heaviest usage! Because of this and the exceptional visual impact these mats are perfect for professional usage such as display games and display windows in shops!

You can [see our mats in action](#) in Sergio (of "Drums and Shako" fame) blog or on our own blog at: <http://baueda.blogspot.it/search/label/backdrop>

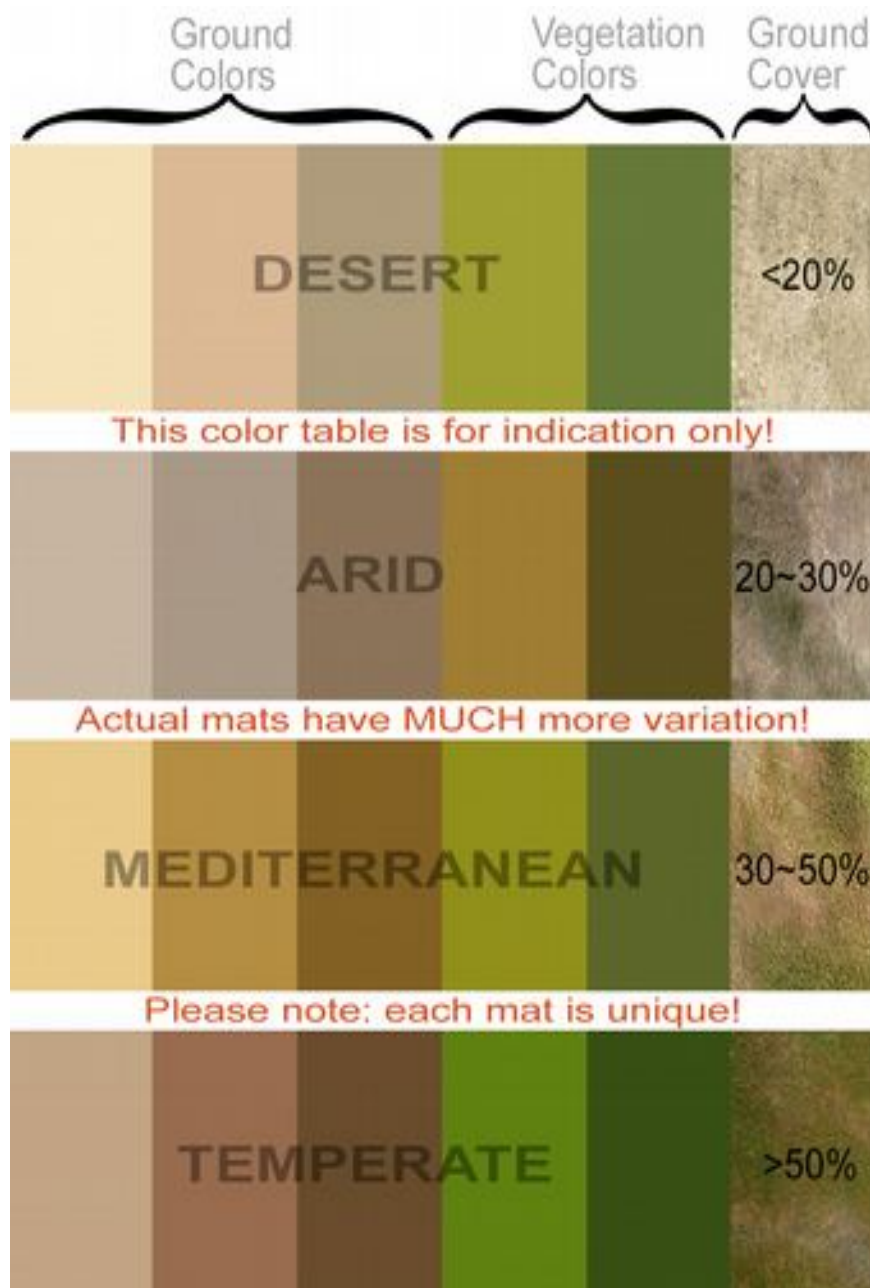

**We can make these in any custom size up to 1800x1200mm
(or 6' x 4') for any terrain type you like.**

However please be aware that the **maximum size** that can be handled by normal post is **100 cm**. If your mat is larger and you want it shipped rolled we would need to arrange shipping by a courier, otherwise will have to ship folded.

If you order a mat with some uncommon characteristic you'll be asked to pay a non-refundable deposit of 20% at the time of the order and the rest once the job is completed, upon approval of pictures of it, subject to your complete satisfaction of course!

It takes approximately 6 weeks for a custom made mat to be ready; this does not change with the mat size, it is due exclusively to the actual manufacturing process. To ensure the terrain mat is perfectly dry, so as to reach its optimal strength before being rolled or folded for transport, we will let it "mature" at least another full week after that before shipping.

Approximate standard color guide:

We can make any color and ground cover combination required.

Roads and water effects can be added as needed.

TEMPERATE

MEDITERRANEAN

STEPPE

ARID

Unfortunately these mats can only be made on a special manufacturing table; the mat needs to be secured to the table during the whole process so any new job has to wait until there is a large enough portion of the table free. We work on a first come first served bases but please note that it is easier to find a free spot for smaller orders: if your job requires the whole table it will have to wait until all the previous ones are finished before we can get started on it. An order for a smaller mat could fit on the table at the same time as another small job and in this case it may jump some place in the queue.

Generally there are always quite a few jobs in the queue at any given time, which means a large custom mat could take up to a couple of months to be ready, but please understand this is subject to change continually.

Pricing is by square foot and therefore depends from mat size, for example:

Item code	Description	Price per foot ²	Price for a mat
TM60	60x60 (2' x 2')	20.60 €	82.40 €
TM90	90x90 (3' x 3')	20.60 €	185.40 €
TM64	180x120 (6' x 4')	20.60 €	494.40 €
WW	Water feature added	x2	Base cost + water effect area

For example for a TM64 with a waterway along one short edge, half a foot wide, it would be 20.6 x 24 square feet (base mat cost) + 20.6 x 2 (water effect cost) x 2 square feet (water effect area) = €494.40 + €82.40 = €576.80 tot.
